

# STARMAST

## ABOUT US

**STARMAST** (St Andrews Resources in Mathematics and Statistics) is an online hub offering high-quality, accessible resources designed to support learners in their journey through maths and stats. All of our resources are free to use, making learning more accessible to everyone, with lots of content created by students!

Our materials include study guides, questions, answers, proof sheets, and more! With continuously growing content, STARMAST aims to be an inclusive, accessible, and extensive knowledge base in mathematics and statistics.

## MOTIVATIONS

Traditional maths and stats textbooks can often be expensive, confusing, and difficult to navigate, even if they are online! STARMAST was created to remove those barriers. We believe nothing should stand between you and learning. By offering free and accessible materials, we aim to make maths and stats more available to everyone, no matter your background or experience.

## BUT HOW?

STARMAST is dedicated to creating accessible online mathematical resources with a strong digital impact. Our website features **free, easy-to-use** study guides that are clear, beginner-friendly, and paired with question and answer sheets to help you test your understanding. **Accessibility and inclusivity** is at the heart of our design. From colour-blind-friendly colour schemes to a new audio narration feature, we aim to support a wide range of learning styles.

## STUDENT INPUT

Students are a big part of what makes STARMAST possible! The work produced by students includes contributing to the content, branding design, logos, colour schemes, and even creating the audio narration features! Students also support the technical side of the website, from managing the domain and security to search engine optimisation, hosting, cookies, and analytics.

## MOVING FORWARDS

By the end of the summer, we aim to expand our resources to include at least **30 study guides**. To reach a wider audience, we are also focusing on sharing STARMAST within the University and beyond, with the goal of becoming a valuable resource for schools, public libraries, and the broader community. We are excited about the future and the opportunity to support even more people in their learning journey!
