

# Factsheet: List of integrals

Tom Coleman

## Summary

A list of common (and some uncommon) integrals of functions.

Throughout,  $a, k$  are real numbers and  $C$  is the constant of integration.

## Antiderivatives of polynomial, rational, exponential, logarithmic functions

| function             | antiderivative w.r.t $x$           | notes                         |
|----------------------|------------------------------------|-------------------------------|
| $a$                  | $ax + C$                           |                               |
| $ax^n$               | $\frac{ax^{n+1}}{n+1} + C$         | $n \in \mathbb{R}, n \neq -1$ |
| $ax^{-1}$            | $a \ln x  + C$                     |                               |
| $\frac{a}{bx+c}$     | $\frac{a}{b} \ln bx+c  + C$        | $b, c \in \mathbb{R}$         |
| $\frac{a}{(bx+c)^n}$ | $\frac{a(bx+c)^{1-n}}{b(1-n)} + C$ | $b, c \in \mathbb{R}$         |
| $ae^{kx}$            | $\frac{a}{k}e^{kx} + C$            |                               |
| $a \ln(kx)$          | $ax \ln kx  - ax + C$              |                               |

## Antiderivatives of trigonometric functions

| function     | antiderivative w.r.t $x$                                                |
|--------------|-------------------------------------------------------------------------|
| $a \sin(kx)$ | $-\frac{a}{k} \cos(kx) + C$                                             |
| $a \cos(kx)$ | $\frac{a}{k} \sin(kx) + C$                                              |
| $a \tan(kx)$ | $\frac{a}{k} \ln  \sec(kx)  + C$                                        |
| $a \cot(kx)$ | $\frac{a}{k} \ln  \sin(kx)  + C$                                        |
| $a \sec(kx)$ | $\frac{a}{k} \ln  \tan(kx) + \sec(kx)  + C$                             |
| $a \csc(kx)$ | $\frac{a}{k} (\ln  \sin(\frac{kx}{2})  - \ln  \cos(\frac{kx}{2}) ) + C$ |

### Antiderivatives of some hyperbolic functions

| function      | antiderivative w.r.t $x$          |
|---------------|-----------------------------------|
| $a \sinh(kx)$ | $\frac{a}{k} \cosh(kx) + C$       |
| $a \cosh(kx)$ | $\frac{a}{k} \sinh(kx) + C$       |
| $a \tanh(kx)$ | $\frac{a}{k} \ln  \cosh(kx)  + C$ |
| $a \coth(kx)$ | $\frac{a}{k} \ln  \sinh(kx)  + C$ |

### Standard forms that integrate to inverse trigonometric/hyperbolic functions

| function                    | antiderivative w.r.t $x$        |
|-----------------------------|---------------------------------|
| $\frac{a}{\sqrt{1-k^2x^2}}$ | $\frac{a}{k} \sin^{-1}(kx) + C$ |

| function                     | antiderivative w.r.t $x$         |
|------------------------------|----------------------------------|
| $-\frac{a}{\sqrt{1-k^2x^2}}$ | $\frac{a}{k} \cos^{-1}(kx) + C$  |
| $\frac{a}{1+k^2x^2}$         | $\frac{a}{k} \tan^{-1}(kx) + C$  |
| $\frac{a}{\sqrt{1+k^2x^2}}$  | $\frac{a}{k} \sinh^{-1}(kx) + C$ |
| $\frac{a}{\sqrt{k^2x^2-1}}$  | $\frac{a}{k} \cosh^{-1}(kx) + C$ |
| $\frac{a}{\sqrt{1-k^2x^2}}$  | $\frac{a}{k} \tanh^{-1}(kx) + C$ |
